

## Easter bonnets

(for adults and children)

You can make your own Easter bonnet using materials found in the house and in the recycling bin, including foil wrappers, cardboard, cereal boxes and magazines. All you need is glue/tape and scissors.

Find a hat to begin with, or use some card and make a basic bonnet or hat

If you have magazines with colour pictures in, cut out blocks of the colours you like and stick them on the base.

If you have ribbon, tie it in a pretty bow

If you have stickers, sticky stars or even glitter (though it might get in your hair!) decorate it with these. Shiny foil is also great. If you have coloured card, or tissue, you could make some flowers and stick them on too.

Show off the final result - to family and friends on a video call perhaps – and we would love to see photos too, (but let us know if we can share them on social media or not.)
